***Reasons for Allowance***

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Humphries et al. discloses a Home Automation System with a specific implementation of a watchdog circuit attached to the serial port of a computer which periodically monitors the host computer to verify that the system is still active.

And Lee teaches a television receiver with an On Screen Display (OSD) unit which provides patterns to indicate an abnormal state of the television receiver.

Neither of these references taken either alone or in combination discloses a method and device of a communication process between an Information Handling System (HIS) and at least one display having On Screen Display (OSD) capability having all the claimed features of applicant's instant invention, specifically including: "an electronic circuit which is arranged so as to be able to function before the operating system has booted wherein the electronic circuit to have access to the On Screen Display (OSD) capability to display text and/or graphic before the operating system has booted". Also, there is no motivation to combine the Humphries reference with the Lee reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
